What is the UpTogether Community?

The UpTogether Community is an online platform where you can build and strengthen your social networks, support your friends, family and community toward achieving your goals, and when available, get capital*!

*Cash offers depend on the availability of funds. You don’t have to pay the money back.

Who is it for?

UpTogether is for people who like sharing support and resources, who want to grow and strengthen their social circles, reach their goals and see others thrive! Anyone 16 years or older can join UpTogether. Most capital offers are dependent on household income and are generally available for households that earn between 50% and 150% of the federal poverty line.
How Does It Work?

**You Share**
1. Create or join small groups.
2. Share your goals.
3. Share support and resources to help each other accomplish your goals.
4. Share your story.

**We Learn and Invest**
We (UpTogether) learn from you!

We invest in you with unrestricted cash to use how you see fit.*

**Together, We Transform**
We share your collective and individual successes to show just how much strength, ingenuity and entrepreneurship is embedded in communities that have been historically undervalued and underappreciated.

Our ultimate goal is that together, we change the narrative and transform policies so every person is recognized for their strengths and contributions, and have what they
What are people saying about UpTogether?

“We named our UpTogether group Women Empowered. We would set goals for ourselves and we would hold each other accountable. Instead of just meeting once a month, we were following up with each other, catching up, asking how we’re doing. Your group will support you in what you’re doing and that’s huge.”

Marisol, Boston

“The connection [in our UpTogether group] was pretty dynamic. It was a great experience to sit down, talk and get to know each other better. It was easy to be transparent and share our goals.”

Skyler, UpTogether Member

What’s the catch?

There is no catch. We believe that every person is an expert in their own life and when people in historically undervalued communities support each other, receive cash investments for their initiative and have the freedom to use that money any way they choose, they are more likely to accomplish their goals and dreams, and achieve long-term socioeconomic mobility.

That’s why UpTogether exists.
